

Configurable. **Comfortable.** Convenient.  
Clinical microscopes engineered by a trusted leader in medical devices.

## BX3 fits me.

When it comes to comfort, I choose the BX3 series. The new ergonomic binocular observation tube offers tilting, telescoping and lifting adjustability to suit my needs. I can adjust the light intensity control with either hand and fly through my slides with the BX46, the lowest stage microscope on the market. BX3 takes my work to new heights, while adapting to mine.

# BX3<sup>®</sup> SYSTEM FEATURES AND BENEFITS

## Manual BX43 and BX46 Features

### BX43

#### Fingertip Camera Control

Position the camera trigger button anywhere you want, and easily snap pictures without ever taking your eyes off of your specimen.

#### Light Intensity Management\*

Light Intensity Manager automatically adjusts and controls light intensity as observation magnification changes.

### BX46

#### Lower Stage

Barely five inches off the work surface, the BX46 stage is inches lower than standard microscopes, allowing greater comfort and enhanced workflow.

#### Binocular Tube\*

New “super ergonomic” binocular tube tilts, lifts, and telescopes for optimum posture and reduced fatigue.

*\*This is a feature of BX43, BX46 and BX53*

#### Stage Controls

Light action, low torque stage controls on an ergonomically designed Y-shaped frame provide ease of access and stability.

## Manual and Motorized BX53 Features

### BX53

#### Touch Button Control

Simplify repetitive observation and imaging tasks with the touch of a button.

#### Ambidextrous Controls

Right or left handed? BX3 allows you to use the microscope comfortably from either side.
